PROJECT EXPERIENCE

1. Grade School Dashboard

Bunda ELementary School | Bekasi Indonesia

2026

I developed an interactive Grade School Dashboard to track and analyze student performance across all subjects.

Dynamic Filtering: Enabled comprehensive data slicing by semester, class, academic year, and teacher to provide targeted insights. Strategic KPIs: Integrated high-level key performance indicators (KPIs) at the top of the dashboard, delivering critical, real-time data to senior management.

Impact: Ensured the leadership team had access to clear, structured information to support data-driven strategic decision-making.

2. Whole sale of Skin Care Dashboard

Nea Beauty | East Java Indonesia

2026

The Dashboard visualize the current business operation. Some KPI describe the Marketing performance, both finance and product.

Dashboard provide proper information that can be used by management to analyzed the operation and to address some weak area to be improved.

PROJECT EXPERIENCE

3. Hospital Dashboard Virtual Hospital

2026

The Hotel Dashboard provides a high-level overview of key performance indicators (KPIs)—including total bookings, revenue, cancellations, average room rate, and average length of stay—for any selected period. Through interactive data visualizations, it delivers comprehensive insights that empower management to make informed, data-driven, and strategic business decisions.

4. Delivery Chocolate Dashboard Awesome Chocolate Company

2026

Developing a Chocolate Shipment Dashboard using Microsoft Power BI and Excel to empower management with the critical insights needed for strategic decision-making.

The dashboard features a Month-over-Month (MoM) reporting structure that clearly visualizes operational trends, highlighting growth and fluctuations over time. By tracking key financial metrics—such as sales, costs, and profit margins—it delivers a comprehensive view of business health. Additionally, it evaluates sales team effectiveness by analyzing individual performance against monthly revenue and profitability benchmarks.

PROJECT EXPERIENCE

5. Insurance Dashboard Vehicle Insurance Company

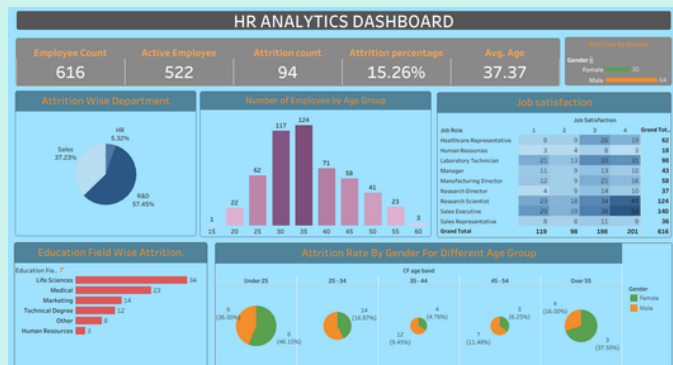

Vehicle Insurance Dashboard providing business critical information of Insurance company. The dashboard display some Key Indicators of business and building several chart to describe on going operation

7. Chocolate Sales Dashboard connect with mysql Awesome Chocholate Company

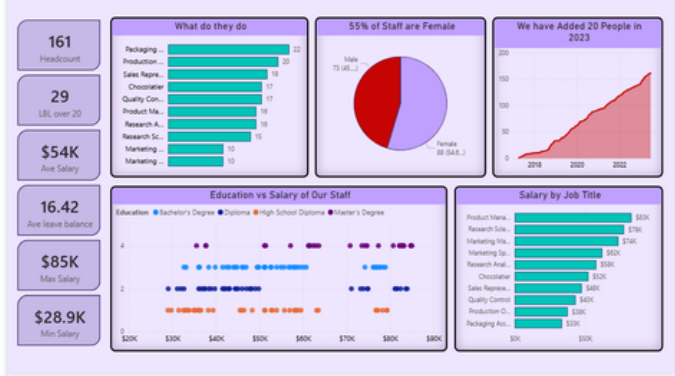

This Chocolate Shipment Dashboard provides comprehensive visibility into delivery operations. By connecting directly to a MySQL server database, the dashboard eliminates manual data handling, allows for secure remote accessibility, and supports multiple users simultaneously, and data-driven decision-making.

9. Human Resource Analytic Dashboard - Tableau

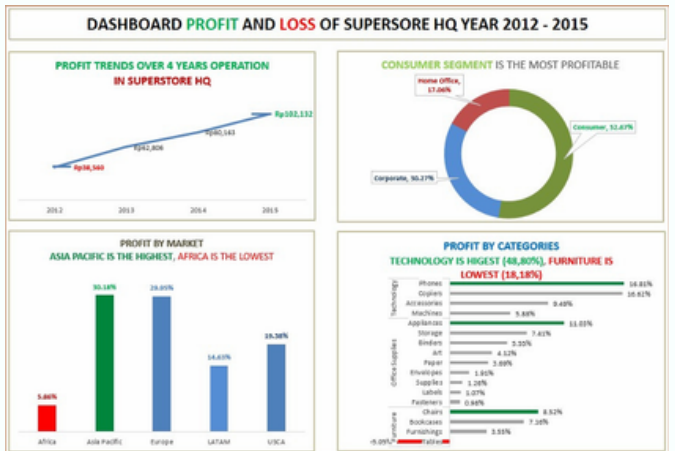

The Dashboard outlining several KPI's of Human Resources need to be monitored because they have correlation with the employee satisfaction. Some critical areas are attritions rate, education levels, ages, job types, and departments.

6. Human Resources Management Dashboard Real company with modification

Human Resources Management Dashboard built to help management get the proper information about human resources. KPI's describe the critical information, there are average salary, rate of leave balance that implicitly indicate the satisfaction level of company's man powers.

8. Dashboard Profit & Loss Using Microsoft Excel Pivot Super Store HQ

The Home Office segment contributes the least to profit and requires further analysis. Africa shows low contribution to profit and sales and needs strategic attention. The Furniture category includes several loss-making items and requires improvement. Same-day shipping has low contribution and should be evaluated Shipping cost structure should be reviewed for better alignment with category performance
